## Elsevier's Integrated Pathology: With STUDENT CONSULT Online Access, 1e By Thomas King MD PhD

Each title in the new Integrated series focuses on the core knowledge in a specific basic science discipline, while linking that information to related concepts from other disciplines. Case-based questions at the end of each chapter enable you to gauge your mastery of the material, and a color-coded format allows you to quickly find the specific guidance you need. Bonus STUDENT CONSULT access - included with the text - allows you to conveniently access the book's content online · clip content to your handheld device · link to content in other STUDENT CONSULT titles · and more! These concise and user-friendly references provide crucial guidance for the early years of medical training, as well as for exam preparation.

- Includes case-based questions at the end of each chapter
- Features a colour-coded format to facilitate quick reference and promote effective retention
- Offers access to STUDENT CONSULT! At [www.studentconsult.com](http://www.studentconsult.com), you'll find the complete text and illustrations of the book online, fully searchable · "Integration Links" to bonus content in other STUDENT CONSULT titles · content clipping for handheld devices · an interactive community center with a wealth of additional resources · and much more!

### **Editorial Review**

#### **Review**

I did enjoy reading up on some pathology we have touched on - asthma, diabetes mellitus. The information is presented well and the use of histological and gross photography with diagrams and charts does work very well. The introductory chapters are good and I like that the topics are organised by systems.

The photographs were really beneficial and well done both the histological and gross anatomy.

This is an excellent feature and the main point of the series. It did highlight really well links to other topics. It definitely has the advantage of keeping the size of the individual books down while still covering a vast amount of information in the series. I also found that it kept my interest going in the topic as I could see the relevance to the overall course.

The case studies look really good and when we are studying pathology I will definitely use them.

I'm looking forward to start studying this subject!

University of Aberdeen medical student
