## Geographic Information System By Jatin Pandey, Darshana Pathak

Geographic Information System (GIS) aims to organize complex interrelation between different layers of information through a process of gathering, analysing, processing, storing, and presenting the spatial data and images available through different sources. It integrates hardware, software, and data for capturing, managing, analysing, and displaying all forms of geographically referenced information. This book presents theory, methods, and latest research finding for problem-solving and decision-making using GIS-based technologies.

### Key Features:

- Explains raster and vector data and attributive database.
- Discusses application of GIS in geotechnical engineering, transport engineering, and water resource engineering.
- Includes model question papers and is well illustrated

### Contents:

#### Introduction to Geographic Information System

- Information System
- Geographic Information System
- Cartography and GIS
- GIS Database
- GIS Data Type
- GIS Data Models
- Topology and GIS

#### Raster and vector data

- Vector Data
- Raster Data
- Raster Encoding Methods
- Shape of the Earth
- Transformation
- Digitization

#### Attribute database and overlay

- Attribute Data
- Relations
- GIS Functionality
- Spatial Query
- Vector Data Queries
- Classification
- Overlay
- Buffer
- Inter-visibility
- Network Theory

### **Remote Sensing and Digital Image Processing**

- Remote Sensing
- Sources of Energy for Remote Sensing
- Interaction of Electromagnetic Radiation with Atmosphere
- Interaction of Electromagnetic Radiation with the Earth's Surface
- Use of Electromagnetic Spectrum for Remote Sensing Purposes
- Process of Remote Sensing
- Sensors and Platforms
- Orbit and Swaths
- Platforms
- Image Processing
- Applications of Remote Sensing

### **Applications of GIS**

- GIS in Planning and Management of Utility Lines
- Geotechnical Engineering
- Water Resource Engineering
- Example of GIS Application Development with Open Source

### **Numerical Problems**

- Scale Conversions
- Playing with Database

### **Other books on GIS:**

**Geoinformatics for Climate Change Studies** (ISBN: 9788179934098)

**Tectonics of the Eastern Continental Margin** (ISBN: 9788179934081)

**HealthGIS:** managing health geospatially (ISBN: 9788179933251)

## **Editorial Review**

### **Users Review**

#### **From reader reviews:**

##### **Donna Wood:**

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite e-book and reading a guide. Beside you can solve your problem; you can add your knowledge by the e-book entitled Geographic Information System. Try to make the book Geographic Information System as your friend. It means that it can to be your friend when you really feel alone and beside associated with course make you smarter than ever. Yeah, it is very fortuned to suit your needs. The book makes you more confidence because you can know everything by the book. So , we should make new experience as well as knowledge with this book.

##### **Diane Reid:**

Hey guys, do you wants to finds a new book you just read? May be the book with the headline Geographic Information System suitable to you? The book was written by popular writer in this era. Typically the book untitled Geographic Information System is the main of several books that will everyone read now. This book was inspired many people in the world. When you read this publication you will enter the new way of measuring that you ever know ahead of. The author explained their concept in the simple way, thus all of people can easily to recognise the core of this guide. This book will give you a great deal of information about this world now. In order to see the represented of the world in this particular book.

##### **John Mendoza:**

What is your hobby? Have you heard this question when you got college students? We believe that that issue was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person just like reading or as examining become their hobby. You have to know that reading is very important in addition to book as to be the thing. Book is important thing to include you knowledge, except your current teacher or lecturer. You see good news or update about something by book. Different categories of books that can you take to be your object. One of them are these claims Geographic Information System.

##### **Ralph Rodriguez:**

Reading a publication make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is composed or printed or outlined from each source this filled update of news. On this modern era like right now, many ways to get information are available for anyone. From media social like newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You

can add your knowledge by that book. Ready to spend your spare time to open your book? Or just looking for the Geographic Information System when you essential it?
