**Brewing** By Michael J. Lewis, Tom W. Young

**Brewing** is designed for those involved in the malting, brewing, and allied industries who have little or no formal training in brewing science. While some elementary knowledge of chemistry and biology is necessary, the book clearly presents the essentials of brewing science and its relationship to brewing technology. **Brewing** focuses on the principles and practices most central to an understanding of the brewing process, including preparation of malt, hops, and yeast; the fermentation process; microbiology and contaminants; and finishing, packaging, and flavor. The second edition gives more emphasis to engineering and technological aspects, with the three new chapters on water, engineering and analysis. **Brewing, Second Edition**, is both a basic text for traditional college, short, and extension courses in brewing science, and a basic reference for anyone in the brewing industry.

### Editorial Review

#### Review

Praise for the second edition:

*"Brewing, Second Edition,* presents the subject of brewing science and practice in an easy-to-read format with excellent illustrations and gives a good grounding in the subject. ...an excellent survey of the science and technology of malting and brewing, suitable both for students of biotechnology in general and as a basic reference for anyone in the brewing industry. Overall, ...a useful introductory text for anyone interested in the technical aspects of the brewing process."

*(Food Technology, June 2003)*

"... these chapters provide a sound basis for the brewing process, with clear expositions of critical steps such as extraction in mashing and metabolism in fermentation."

*(American Society of Brewing Chemists Newsletter, 63:2, 2003)*

Praise for the first edition:

"This book presents the essentials of brewing science and is a useful guide for students and professional brewers."

*(Food Science and Technology Abstracts)*

"...an excellent survey of the science and technology of malting and brewing, suitable both for students of biotechnology in general and as an introduction for specialized students of brewing."

*(Society for General Microbiology Quarterly)*

### Users Review

#### From reader reviews:

##### **Deloras Pinkston:**

Typically the book Brewing has a lot of knowledge on it. So when you read this book you can get a lot of profit. The book was compiled by the very famous author. This articles author makes some research ahead of write this book. This particular book very easy to read you may get the point easily after perusing this book.

##### **Rose Villegas:**

Can you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't evaluate book by its deal with may doesn't work at this point is difficult job because you are frightened that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer is usually Brewing why because the excellent cover that make you consider concerning the content will not disappoint you. The inside or content is usually fantastic as the

outside or cover. Your reading 6th sense will directly assist you to pick up this book.

**Lucille Roller:**

As we know that book is significant thing to add our knowledge for everything. By a e-book we can know everything you want. A book is a range of written, printed, illustrated or even blank sheet. Every year seemed to be exactly added. This guide Brewing was filled regarding science. Spend your free time to add your knowledge about your research competence. Some people has various feel when they reading a book. If you know how big benefit from a book, you can feel enjoy to read a reserve. In the modern era like right now, many ways to get book that you simply wanted.

**Janice Smith:**

That publication can make you to feel relax. This particular book Brewing was bright colored and of course has pictures on there. As we know that book Brewing has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and think that you are the character on there. Therefore not at all of book are usually make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading that.
