Editorial Review

About the Author

Stuart McClure, CNE, CCSE, Global CTO for McAfee/Intel, is responsible for a nearly \$3B consumer and corporate security products business. During his tenure at McAfee, Stuart has also held the General Manager position for the Security Management Business for McAfee/Intel, which enabled all McAfee corporate security products to be operationalized, managed, and measured. Alongside those roles, Stuart has also run an elite team of good guy hackers inside McAfee called TRACE that discovered new vulnerabilities and emerging threats. Previously, Stuart helped run security at the largest healthcare company in the U.S., Kaiser Permanente. In 1999, Stuart was also the original founder of Foundstone, Inc., a global consulting and products company, which was acquired by McAfee in 2004.

Joel Scambray, CISSP, is Managing Principal with Citigal as well as Co-Founder of Consciere LLC. He was previously chief strategy officer for Leviathan Security Group, an information security consultancy. He was a senior director at Microsoft Corporation, where he led Microsoft's online services security efforts for three years before joining the Windows platform and services division to focus on security technology architecture. Before joining Microsoft, Joel co-founded security software and services startup Foundstone, Inc., and helped lead it to acquisition by McAfee. He has spoken widely on information security at forums including Black Hat, I-4, and The Asia Europe Meeting (ASEM). Joel is the co-author of all five editions of *Hacking Exposed* and lead author of *Hacking Exposed: Windows*, currently in its third edition, and *Hacking Exposed: Web Applications*, currently in its second edition.

George Kurtz, CISSP, George Kurtz is co-founder and CEO of CrowdStrike, a cutting-edge big data security technology company focused on helping enterprises and governments protect their most sensitive intellectual property and national security information. George Kurtz is also an internationally recognized security expert, author, entrepreneur, and speaker. He has almost twenty years of experience in the security space and has helped hundreds of large organizations and government agencies around the world tackle the most demanding security problems. His entrepreneurial background and ability to commercialize nascent technologies has enabled him to drive innovation throughout his career by identifying market trends and correlating them with customer feedback, resulting in rapid growth for the businesses he has run. In 2011 George relinquished his role as McAfee's Worldwide Chief Technology Officer to his co-author and raised \$26M in venture capital to create CrowdStrike. During his tenure as McAfee's CTO, Kurtz was responsible for driving the integrated security architectures and platforms across the entire McAfee portfolio. Kurtz also helped drive the acquisition strategy that allowed McAfee to grow from \$1b in revenue in 2007 to over \$2.5b in 2011. In one of the largest tech M&A deals in 2011, Intel (INTC) acquired McAfee for nearly \$8b. Prior to joining McAfee, Kurtz was Chief Executive Officer and co-founder of Foundstone, Inc., which was acquired by McAfee in October 2004.
