**LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample Questions, Green Interior Design and Construction, Green Building ... and Sustainability (2nd Edition)** By Gang Chen

**Pass the LEED AP ID+C Exam, Get Your Building LEED Certified, Fight Global Warming and Save Money!**

Starting on December 1, 2011, GBCI began to draw LEED AP ID+C Exam questions from the second edition of *Green Building and LEED Core Concepts Guide*. We have incorporated this latest information in our books.

LEED (Leadership in Energy and Environmental Design) is one of the most important trends in development and is revolutionizing the construction industry. It has gained tremendous momentum and has a profound impact on our environment.

From this book, you will learn how to:

1. Pass the LEED AP ID+C Exam.
2. Register and achieve LEED certification for a building.
3. Understand the intent of each LEED prerequisite and credit.
4. Calculate points for LEED credits.
5. Identify the credit path, submittal requirements, synergies, possible strategies and technologies, project phase, LEED submittal phase, and responsible party for each prerequisite and credit.
6. Earn extra credit (exemplary performance) for LEED.
7. Implement the related codes and standards.
8. Obtain points for categories not yet clearly defined by the USGBC.

Most of the existing books on LEED and the LEED exams are too expensive and complicated to be practical or helpful. This guide fills in the blanks and demystifies LEED. It uncovers the secrets, codes, and jargon for LEED as well as

the true meaning of "going green." It provides a solid foundation and fundamental framework for LEED. It covers every major aspect of LEED in plain and concise language, and introduces it to ordinary people. This guide is easy to carry around. You can read it whenever you have a few extra minutes. It is an indispensable book for ordinary people, developers, brokers, contractors, administrators, architects, landscape architects, engineers, interns, drafters, designers, and other design professionals.

Check out FREE tips and info for all LEED Exams and ARE Exams at [GeeForums.com](http://GeeForums.com), you can post jpeg files of your vignettes or your questions for other users' review.

### **What others are saying about "LEED ID&C Exam Guide"...**

#### **"Excellent Guide and Good Manual**

"I passed the LEED BD&C this year using Gang Chen's study guide so when it came time to go for the LEED ID&C exam, I immediately went back to Gang Chen. His style is easy to follow and perfect ... On the book itself, Gang Chen provides study hints and guidance as well as an outline format that makes it easy for the reader to grasp key points. He also provides an excellent review of the entire accreditation process which can save people time in personal research. The books are more than study guides; they are helpful as reference manuals because of the easy to follow format. Definitely a keeper in my electronic bookshelf for future project reference."

--Karen M. Scott

#### **"Great Study Material**

"This book is a great study guide for preparing you for the LEED test. It takes out the unnecessary information and gives you the information you'll need to know in order to pass the exam. It was not overwhelming like other study materials I have read. It also contains sample questions that are very helpful!"

--Danielle Lee Darczy

#### **"Great Way to Begin the LEED Study Process**

"...Overall, I am pleased with this book and will continue to use it as I prepare for my LEED certification exams."

--Tara Oakes

#### **"Sub-title says it all!**

"...This book really delivered on my goal. I am pretty comfortable with the knowledge/information scope required for the exam as well as the style of testing. The book really helped me structure the huge amount of information that is covered in the exam -- there are numerous tips for studying and remembering information that are really quite helpful..."

I would recommend this book to anyone in the early stages of planning for the exam..."

--S. Minchuk

## **Editorial Review**

From the Author

### **Strategies for Preparing for LEED AP ID+C Exam**

LEED AP ID+C Exam is easier than LEED AP BD+C Exam. There are several strategies for preparing for LEED AP ID+C Exam:

#### **1. Bare bone strategy:**

This strategy is bold, risky, but effective, low cost, and takes the least amount of time. You can spend about **two weeks** to prepare and pass the exam:

- a. Download and read the latest candidate handbook for LEED AP ID+C Exam
- b. Study the FREE PDF files listed at the end of the latest candidate handbook for LEED AP ID+C Exam (About 20% to 30% of the test content will come from these materials).
- c. Study my books, "LEED ID&C Exam Guide" and "LEED ID&C Mock Exam" (Covers the fundamental and most important information of the remaining 70% to 80% of test content will come from these materials).
- d. Do NOT buy or read the USGBC reference guide AT ALL

#### **Pros:**

- a. Save time and money and still have a good chance of passing. In fact, a number of my readers did pass the exam using this approach.
- b. You can prepare and pass the exam in about **two weeks**.

#### **Cons:**

- a. Your score may not be as high as you want since you COMPLETELY skip the USGBC reference guide (probably range from 170 to 180).
- b. You may feel nervous during the real exam. You may swear that you fail in the exam, and end up passing. You may have no clue why you pass but I know why you pass the exam though: my books cover the fundamental and most important information of the exam and set up a solid foundation for your LEED knowledge.

#### **2. Middle of the road strategy:**

This strategy is exactly the same as **bare bone strategy**, except that you do the following extra things:

- a. Buy or read portion of the USGBC reference guide to supplement my two books: Only refer to or read the USGBC reference guide for items you have questions, or for detailed information not covered by my books such as the Sections on Implementation and Calculations. I skip these two sections in my book, "LEED ID&C Exam Guide" because it takes too much time for you to read the information, and I think you should be able to handle most of the tasks covered in these two sections if you MASTER the other sections.
- b. Do a few extra sets of mock exams.

#### **Pros:**

- a. Save time and money and still have an excellent chance of passing. In fact, many readers did pass the exam using this approach.
- b. You can prepare and pass the exam in about **two to four weeks**.

**Cons:**

- a. Your score may not be as high as you want (probably range from 170 to 185).
- b. You may still feel nervous during the real exam.

**3. Comprehensive strategy:**

This strategy is exactly the same as **bare bone strategy**, except that you do the following extra things:

- a. Buy or read the USGBC reference guide from cover to cover several times.
- b. Write your own notes or create your own spread sheets based on the USGBC reference guide.
- c. Do every set of mock exams that you can find.

**Pros:**

- a. You have an excellent chance of passing if you can REALLY read the reference guide. In fact, several readers did pass the exam using this approach.

**Cons:**

- a. Your score may be either very high or very low (probably either range from 180 to 200, OR fail).
- b. You need to spend two months or more to prepare and pass the exam.
- c. You drag the exam prep process too long, and become tired of reading the USGBC reference guide, OR you can NOT find enough time to read the reference guide, and you end up failing the exam.

If you can pass the specialty exam, you should be able to pass the LEED Green Associate Exam. Make sure you download the PDF files listed in the candidate's handbook and peruse them. See FREE slides at our website on the LEED exam prep at:

[GreenExamEducation.com](http://GreenExamEducation.com)

**Latest trend for LEED Exams**

Recently, there are quite a few readers run into the versions of the LEED exams that have many questions on refrigerants (CFC, HCFC, and HFC), the following advice will help you answer these questions correctly:

For more information, see free pdf file of "The Treatment by LEED of the Environmental Impact of HVAC Refrigerants" that you can download at link below:

[gbc.org/Files/References/The-Treatment-by-LEED-of-the-Environmental-Impact-of-HVAC-Refrigerants.pdf](http://gbc.org/Files/References/The-Treatment-by-LEED-of-the-Environmental-Impact-of-HVAC-Refrigerants.pdf)

This is a VERY important document that you need to become familiar with. Many real LEED exam questions (CFC, HCFC, and HFC, etc.) come from this document. You need to download it for free and read it at least 3 times.

Pay special attention to the Table on ODP and GWP on page 3. You do not have to remember the exact value of all ODPs and GWPs, but you do need to know the rough number for various groups of refrigerants."

This latest trend regarding refrigerants (CFC, HCFC, and HFC) for LEED Exams has a lot to do with LEED v3.0 Credit Weighting. EA (including refrigerants) is the biggest winner in LEED v3.0, meaning the category has MORE questions than any other areas for ALL the LEED exams. See pages 34 to 35 of my book, *LEED ID&C Exam Guide* quoted below:

### **How are LEED credits allocated and weighted?**

**Answer:** They are allocated and weighted per strategies that will have greater positive impacts on the most important environmental factors: CO<sub>2</sub> reductions and energy efficiency.

They are weighted against **13 aftereffects of human activities**, including carbon footprint / climate change (25%), indoor-air quality (15%), resource/fossil-fuel depletion (9%), particulates (8%), water use/water intake (7%), human health: cancer (7%), ecotoxicity (6%), eutrophication (5%), land use/habitat alteration (5%), human health: non cancer (4%), smog formation (4%), acidification (3%), and ozone depletion (2%).

These 13 aftereffects were created by the U.S. Environmental Protection Agency (EPA), and are also known as "**TRACI**", a mnemonic for "Tool for the Reduction and Assessment of Chemical and Other Environmental Impacts."

- 1) The USGBC used a reference building to estimate environmental impact in the 13 categories above.
- 2) The USGBC also used a tool developed by the National Institute of Standard and Technology (NIST) to prioritize the TRACI categories.
- 3) The USGBC also created a matrix to show the existing LEED credits and the TRACI categories, and used data that quantify building impacts on human health and environment to allocate points for each credit.

The points for Energy and Transportation credits have been greatly increased in LEED 2009, primarily because of the importance to reduce carbon or greenhouse gas emissions. Water Efficiency is also a big winner in the credits, doubling from 5 to 10 points for some LEED rating systems.

In addition to the weighting exercise, the USGBC also used value judgments, because if they only used the TRACI-NIST tool, some existing credits would be worth almost nothing, like the categories for human health and indoor air quality. The USGBC wanted to keep the LEED system somewhat consistent and retained the existing credits including those with few environmental benefits. So each credit was assigned at least one point in the new system.

There are NO negative values or fractions for LEED points.

20% reduction of indoor water-use used to be able to gain points, now this is a prerequisite in LEED 2009.

From the Inside Flap

### **Why is "LEED ID&C Exam Guide" Needed?**

There are two main purposes for this book: to help you pass the LEED AP ID+C (Building Design and Construction) Exam and to assist you with understanding the process of getting a building LEED certified.

The LEED AP ID+C Exam has two parts (or sections):

Part One is EXACTLY the same as the LEED Green Associate Exam. It has 100 multiple choice questions and must be finished within two hours (The total exam time for BOTH parts of the exam is four hours). In this book, "LEED AP ID+C Exam Part One," "LEED AP ID+C Exam Section One," and "LEED Green Associate Exam" are used interchangeably since they are EXACTLY the same.

Part Two is the LEED AP ID+C specialty exam. It focuses on information and knowledge related directly to green interior design and construction (ID+C). It also contains 100 multiple choice questions and must be finished within two hours.

Both sections (Part One and Part Two) of the LEED AP ID+C Exam must be taken back-to-back in the same sitting. The only exception is when a test taker fails one of the two parts, he can retake only the failed section of the exam at a later date.

The raw exam score is converted to a scaled score ranging from 125 to 200. The passing score is 170 or higher. You need to answer about 60 questions correctly for each section to pass. There is an optional 10-minute tutorial for computer testing before the exam and an optional 10-minute exit survey.

The LEED Green Associate Exam is the most important LEED exam for two reasons:

1. You have to pass it in order to get the title of LEED Green Associate.
2. It is also the required Part One (2 hours) of ALL LEED AP+ exams. You have to pass it plus Part Two (2 hours) of the specific LEED AP+ exam of your choice to get any LEED AP+ title unless you have passed the old LEED AP exam before June 30, 2009.

There are a few ways to prepare for the LEED AP ID+C Exam:

1. You can take USGBC courses or workshops. You should take USGBC classes at both the 100 (Awareness) and 200 (LEED Core Concepts and Strategies) level to successfully prepare for Part One of the exam. USGBC classes at 300 level (Green Interior Design and Construction: The LEED Implementation Process) can be taken to prepare for Part Two of the exam. A one-day course normally costs \$450 (as of publication) with an early registration discount, otherwise it is \$500. You will also have to wait until the USGBC workshops or courses are offered in a city near you.

OR

2. Take USGBC online courses. Refer to the USGBC or GBCI websites for information. The USGBC online courses are less personal and still expensive.

OR

3. Read related books. Unfortunately, there are few official USGBC books on the LEED AP ID+C Exam, and, as of publication, no exam guides with sample questions. *LEED AP ID+C Exam Guide* is one of the first books covering this subject and will fill in this blank to assist you with passing the exam.

OR

4. The USGBC Reference Guides: They are comprehensive, but they give too much information. Searching for information related to LEED AP ID+C Exam from the USGBC Reference Guides is like "looking for a needle in a haystack." For example, The LEED 2009 Reference Guide for Green Building Design and Construction (ID&C) has about 480 full-size pages. Many of the calculations in the books are too detailed for the exam. They are also expensive (approximately \$200 each, so most people may not buy them for their personal use, but instead, will seek to share an office copy).

It is good to read a reference guide from cover to cover if you have the time. The problem is that few people have the time to read the whole reference guide. Even if you do read the whole guide, you may not remember the important issues to pass the LEED exam. You need to reread the material several times before you can remember much of it.

Reading the reference guide from cover to cover without a guidebook is a difficult and inefficient way of preparing for the LEED AP ID+C exam, because you do NOT know what USGBC and GBCI are looking for in the exam.

OR

5. Various books published by a third party are available on Amazon. However, most of them are not very helpful.

To stay at the forefront of the LEED and green building movement, I sign up for USGBC courses and workshops myself, and I review the USGBC and GBCI websites and many other sources to get as much information as possible on LEED. Based on this very comprehensive research, I summarize the information in my latest book, "LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample Questions, Mock Exam, Green Interior Design and Construction, Green Building LEED Certification, and Sustainability (LEED v3.0)." I have done the hard work so that you can save time preparing for the exam by reading it.

"LEED ID&C Exam Guide" will fill in the blanks and become a valuable, reliable source:

- a. It will give you more information for your money. It has more information than the related USGBC workshops.
- b. It is exam-oriented and more effective than the USGBC reference guides.
- c. It is better than most, if not all, of the other third-party books. It gives you comprehensive study materials, sample questions and answers, mock exams and answers, and critical information on building LEED certification and going green. Other third-party books only give you a fraction of the information.
- d. It is comprehensive yet concise. It is easy to carry around. You can read it whenever you have a few extra minutes.
- e. It is great a timesaver. I have highlighted the important information that you need to understand and MEMORIZE. I also make some acronyms and short sentences to help you easily remember the credit names.

It should take you about 1 to 2 weeks of full-time study to pass each of the LEED exams. I have met people who have spent 40 hours to study and passed the exams.

You can find sample texts and other information on the LEED Exam Guides Series in customer discussion sections under each of my book's listing on Amazon.

From the Back Cover

#### **Tips on How to Pass a LEED Exam on the First Try and in One Week and Responses to Some of the Readers' Questions**

The following are tips on how to pass a LEED Exam on the first try and in one week and my responses to some readers' questions, and I think they may help you:

1. I found the reference guide way too tedious. Can I only read your book and just refer to the USGBC reference guide (if one is available for the exam I am taking) when needed?

Response: Yes. That is one way to study.

2. Is one week really enough for me to prepare for the exam while I am working?

Response: Yes, if you can put in 40 to 60 hours during the week, study hard and you can pass the exam. This exam is similar to a history or political science exam; you need to **MEMORIZE** the information. If you take too long, you will probably forget the information by the time you take the test.

In my book, I give you tips on how to **MEMORIZE** the information, and I have already highlighted/underlined the most important information that you definitely have to **MEMORIZE** to pass the exam. It is my goal to use this book to help you to pass the LEED exam with the minimum time and effort. I want to make your life easier.

3. Would you say that if I buy your LEED Exam Guide Series books, I could pass the exam using no other study materials? The books sold on the USGBC website run in the hundreds of dollars, so I would be quite happy if I could buy your book and just use that.

Response: First of all, there are readers who have passed the LEED Exam by reading only my books in the LEED Exam Guides Series (ArchiteG.com). My goal is to write one book for each of the LEED exams, and make each of my books stand alone to prepare people for one specific LEED exam.

Secondly, people learn in many different ways. That is why I have added some new advice below for people who learn better by doing practice tests.

If you do the following things, you have a very good chance of passing the LEED exam (NOT a guarantee, nobody can guarantee you will pass):

a. If you study, understand and **MEMORIZE** all of the information in my book, and do NOT panic when you run into problems you are not familiar with, and use the guess strategy in my book, then you have a very good chance of passing the exam.

You need to **UNDERSTAND** and **MEMORIZE** the information in the book and score almost a perfect score on the mock exam in this book. This book will give you the **BULK** of the most **CURRENT** information that you need for the specific LEED exam you are taking. You **HAVE** to know the information in my book in order to pass the exam.

b. If you have not done any LEED projects before, I suggest you also go to the USGBC website and download the latest LEED credit templates for the LEED rating system related to the LEED exam you are taking. Read the templates and become familiar with them. This is important. See link below:

[usgbc.org/DisplayPage.aspx?CMSPageID=222](http://usgbc.org/DisplayPage.aspx?CMSPageID=222)

There are so **MANY** different ways to study and pass, pick one path that is right for you.

The LEED exam is NOT an easy exam, but anyone with a 7th grade education should be able to study and pass the LEED exam if he prepares correctly.

If you have extra time and money, the only other book I would recommend is the USGBC reference guide, the official book for the LEED exam. I know some people who did not even read the reference guide from cover to cover when they took the exam. They just studied the information in my book, and only referred to the reference guide to look up a few things, and they passed on the first try. Some of my readers have even passed WITHOUT reading the USGBC reference guide AT ALL.

4. I am preparing for the LEED exam. Do I need to read the 2" thick reference?

Response: See answer above.

5. For LEED v3.0, will the total number of points be more than 110 in total if a project gets all of the extra credits and all of the standard credits?

Response: No. For LEED v3.0, there are 100 base points and 10 possible bonus points. There are many ways to get bonus points (extra credits or exemplary performance), but you can have a maximum number of 6 ID bonus points and 4 Regional Priority bonus points. So, the maximum points for ANY project will be 110.

On another note, the older versions of LEED rating systems all have less than 110 possible points except LEED for Home, which has 136 possible points.

6. For the exam, do I need to know the project phase in which a specific prerequisite/credit takes place? (i.e., pre-design, schematic design, etc.)

Response: The information on the project phase (NOT LEED submittal phase) for each prerequisite/credit is NOT mentioned in the USGBC reference guide, but it is covered in the USGBC workshops. If it is important enough for the USGBC workshops to cover, then it may show up on the actual LEED exam.

Most, if not all, other third party books completely miss this important information. I cover it for each prerequisite/credit in my book for the LEED exam because I think it is very important.

Some people THINK that the LEED exam ONLY tests information covered by the USGBC reference guide. They are wrong.

The LEED exam does test information NOT covered by the USGBC reference guide at all. This may include the process of LEED submittal and project team coordination, etc.

I would MEMORIZE this information if I were you, because it may show up on the LEED exam. Besides, this information is not hard to memorize once you understand it, and you need to know it to do actual LEED submittal work anyway.

7. Are you writing new versions of books for the new LEED exams? What new books are you writing?

Response: Yes, I am working on other books in the LEED Exam Guide Series. I will be writing one book for each of the LEED exam. See LEEDSeries.com for more information.

## Users Review

### From reader reviews:

**Herman Pruitt:**

Exactly why? Because this LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample Questions, Green Interior Design and Construction, Green Building ... and Sustainability (2nd Edition) is an unordinary book that the inside of the publication waiting for you to snap the idea but latter it will zap you with the secret that inside. Reading this book beside it was fantastic author who all write the book in such remarkable way makes the content on the inside easier to understand, entertaining means but still convey the meaning entirely. So , it is good for you for not hesitating having this any more or you going to regret it. This amazing book will give you a lot of gains than the other book have such as help improving your talent and your critical thinking means. So , still want to postpone having that book? If I were being you I will go to the e-book store hurriedly.

**Bobby Kile:**

Do you have something that you enjoy such as book? The reserve lovers usually prefer to opt for book like comic, limited story and the biggest the first is novel. Now, why not attempting LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample Questions, Green Interior Design and Construction, Green Building ... and Sustainability (2nd Edition) that give your satisfaction preference will be satisfied by reading this book. Reading habit all over the world can be said as the way for people to know world better then how they react towards the world. It can't be explained constantly that reading routine only for the geeky particular person but for all of you who wants to possibly be success person. So , for all of you who want to start studying as your good habit, you may pick LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample Questions, Green Interior Design and Construction, Green Building ... and Sustainability (2nd Edition) become your own personal starter.

**Patrick Garcia:**

Many people spending their moment by playing outside along with friends, fun activity along with family or just watching TV the whole day. You can have new activity to invest your whole day by reading through a book. Ugh, think reading a book can actually hard because you have to take the book everywhere? It ok you can have the e-book, having everywhere you want in your Smartphone. Like LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample Questions, Green Interior Design and Construction, Green Building ... and Sustainability (2nd Edition) which is getting the e-book version. So , why not try out this book? Let's notice.

**Sylvia Alexander:**

Publication is one of source of expertise. We can add our expertise from it. Not only for students but native or citizen need book to know the revise information of year to be able to year. As we know those guides have many advantages. Beside most of us add our knowledge, also can bring us to around the world. From the book LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample Questions, Green Interior Design and Construction, Green Building ... and Sustainability (2nd Edition) we can have more advantage. Don't that you be creative people? To get creative person must like to read a book. Simply choose the best book that appropriate with your aim. Don't always be doubt to change your life at this time book LEED ID&C Exam Guide: A Must-Have for the LEED AP ID+C Exam: Study Materials, Sample

Questions, Green Interior Design and Construction, Green Building ... and Sustainability (2nd Edition). You can more appealing than now.
