## Architecting Composite Applications and Services with TIBCO (TIBCO Press) By Paul C. Brown

“Paul Brown has done a favor for the TIBCO community and anyone wanting to get into this product set. Architecting TIBCO solutions without knowing the TIBCO architecture fundamentals and having insight to the topics discussed in this book is risky to any organization. I fully recommend this book to anyone involved in designing solutions using the TIBCO ActiveMatrix products.”

—Nikky Sooriakumar, TIBCO Architect, PruHealth

“An effective primer for building composite services using TIBCO, this book provides a holistic approach to strategy integrated with implementation details. I find it tremendously useful in moving recursively from business solutions to design patterns to architecture. Tangible examples are provided that build to composite services. And advanced topics are explored that add another valuable implementation dimension. I recommend this book to software architects who need to quickly build an effective business- services-oriented environment.”

—Abby H. Brown, Ph.D., Enterprise Architect, Intel Corp.

The architecture series from TIBCO® Press comprises a coordinated set of titles for software architects and developers, showing how to combine TIBCO components to design and build real-world solutions. TIBCO’s product suite comprises components with functionality ranging from messaging through services, service orchestration, business process management, master data management, and complex event processing.

In composite applications and services, multiple components collaborate to provide the required functionality. There are many possible architectures for these distributed solutions: Some will serve the enterprise well, while others will lead to dead-end projects. *Architecting Composite Applications and Services with TIBCO®* shows how to create successful architectures with TIBCO products for both overall solutions and individual services. This guide builds on the basic design patterns and product information presented in the first title in

*the series, TIBCO® Architecture Fundamentals (Addison-Wesley, 2011).*

After reading this title, you will be able to

- Create architectures for solutions, service specifications, and service implementations
- Understand the intended TIBCO product roles in composite applications and services
- Define manageable approaches to service versioning and naming
- Conduct and interpret performance benchmarks
- Identify and select appropriate design patterns for a variety of tasks

***Architecting Composite Applications and Services with TIBCO®*** is intended primarily for project architects defining overall solutions and specifying the supporting components and services. TIBCO developers, enterprise architects, and technical managers will also find material of interest. No specific prior knowledge of architecture is assumed.

### Editorial Review

#### About the Author

**Dr. Paul C. Brown**, a Principal Software Architect at TIBCO Software Inc., is the author of *Succeeding with SOA* (Addison-Wesley, 2007), *Implementing SOA* (Addison-Wesley, 2008), and *TIBCO® Architecture Fundamentals* (Addison-Wesley, 2011), and is a coauthor of the SOA Manifesto ([soa-manifesto.org](http://soa-manifesto.org)). Dr. Brown's extensive design work on enterprise-scale information systems led him to develop the concept of total architecture, which explains how business processes and information systems are so intertwined that they must be architected together.

### Users Review

#### From reader reviews:

##### **Edward Brown:**

Spent a free a chance to be fun activity to perform! A lot of people spent their leisure time with their family, or their friends. Usually they doing activity like watching television, about to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? May be reading a book could be option to fill your free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to try look for book, may be the guide untitled *Architecting Composite Applications and Services with TIBCO* (TIBCO Press) can be good book to read. May be it is usually best activity to you.

##### **Ariane Gray:**

Reading a book to get new life style in this calendar year; every people loves to go through a book. When you learn a book you can get a lots of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information in it. The information that you will get depend on what forms of book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself read a fiction books, these kinds of us novel, comics, and also soon. The *Architecting Composite Applications and Services with TIBCO* (TIBCO Press) will give you a new experience in examining a book.

##### **Virginia Shrader:**

In this age globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The book that recommended to your account is *Architecting Composite Applications and Services with TIBCO* (TIBCO Press) this reserve consist a lot of the information on the condition of this world now. This kind of book was represented how does the world has grown up. The language styles that writer make usage of to explain it is easy to

understand. The actual writer made some analysis when he makes this book. This is why this book appropriate all of you.

**Regina Schubert:**

Reserve is one of source of know-how. We can add our information from it. Not only for students but in addition native or citizen want book to know the upgrade information of year to be able to year. As we know those publications have many advantages. Beside we add our knowledge, also can bring us to around the world. From the book *Architecting Composite Applications and Services with TIBCO* (TIBCO Press) we can have more advantage. Don't that you be creative people? To become creative person must prefer to read a book. Merely choose the best book that suited with your aim. Don't be doubt to change your life with this book *Architecting Composite Applications and Services with TIBCO* (TIBCO Press). You can more pleasing than now.
