Graphic Design for Architects: A Manual for Visual Communication By Karen Lewis

Graphic Design for Architects is a handbook of techniques, explanations and examples of graphic design most relevant to architects. The book covers a variety of scales of graphic design, everything from portfolio design and competition boards, to signage and building super-graphics – to address every phase of architectural production.

This book combines and expands on information typically found in graphic design, information design, and architectural graphics books. As architectural communication increases to include more territory and components of a project, it is important for designers to be knowledgeable about the various ways in which to communicate visually. For instance, signage should be designed as part of the process – not something added at the end of a project; and the portfolio is a manifestation of how the designer works, not just an application to sell a design sensibility. In thinking about architecture as a systematic and visual project, the graphic design techniques outlined in this book will help architects process, organize and structure their work through the lens of visual communication.

Each chapter is titled and organized by common architectural modes of communication and production. The chapters speak to architects by directly addressing projects and topics relevant to their work, while the information inside each chapter presents graphic design methods to achieve the architects' work. In this way, readers don't have to search through graphic design books to figure out what's relevant to them – this book provides a complete reference of graphic techniques and methods most useful to architects in getting their work done.

Editorial Review

Review

‘By clearly demonstrating, both as an example itself as well as through explaining its procedures, the numerous formats and techniques within architecture's extended field of production and reproduction (Portfolios, RFQs, Proposal Books – the extensive combinations of images, texts, diagrams, and spreadsheets that are, in total, and in various permutations, the architect's *mode d'emploi*) *Graphic Design for Architects* is not only a useful subject, but also a required skill, and now a necessary volume for any architect's studio bookshelf.’ - **John McMorrough, Associate Professor, Taubman College of Architecture and Urban Planning, University of Michigan, USA**

'Graphic Design for Architects - A Manual for Visual Communication is a comprehensive overview that is compelling for both written content and the wide-ranging use of graphic examples in the book. The combination of interviews together with numerous contributors adds a wealth of experience and knowledge into this work. I'm fairly certain that most readers will learn something from this book as it is filled with examples and alternative approaches. For the non-architect, this book will reveal some the architectural secret-sauce that is commonly seen on project sights - thereby helping the reader to appreciate what the architect was trying to do with his presentation.' - **Jeff Thurston, 3D Visualization World Magazine**

About the Author

Karen Lewis is an architect, educator and designer who works at the intersection of information, architecture and landscape. Her design work and research in infrastructural systems, data visualization and graphic techniques have been recognized internationally. Currently Karen Lewis is a tenured professor on the architecture faculty at the Knowlton School of Architecture, Ohio State University, USA.

Users Review

From reader reviews:

Gale Taylor:

As people who live in the modest era should be update about what going on or information even knowledge to make them keep up with the era and that is always change and move ahead. Some of you maybe will certainly update themselves by examining books. It is a good choice in your case but the problems coming to you is you don't know which you should start with. This *Graphic Design for Architects: A Manual for Visual Communication* is our recommendation so you keep up with the world. Why, as this book serves what you want and need in this era.

Ida Resler:

Reading a e-book can be one of a lot of action that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new facts.

When you read a reserve you will get new information mainly because book is one of various ways to share the information as well as their idea. Second, reading a book will make you more imaginative. When you reading a book especially tale fantasy book the author will bring you to imagine the story how the character types do it anything. Third, you can share your knowledge to some others. When you read this Graphic Design for Architects: A Manual for Visual Communication, you can tell your family, friends as well as soon about yours guide. Your knowledge can inspire others, make them reading a guide.

Brenda Seddon:

This Graphic Design for Architects: A Manual for Visual Communication is great book for you because the content that is certainly full of information for you who also always deal with world and possess to make decision every minute. This kind of book reveal it facts accurately using great coordinate word or we can point out no rambling sentences inside it. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but challenging core information with lovely delivering sentences. Having Graphic Design for Architects: A Manual for Visual Communication in your hand like finding the world in your arm, data in it is not ridiculous a single. We can say that no guide that offer you world throughout ten or fifteen second right but this e-book already do that. So , this really is good reading book. Heya Mr. and Mrs. busy do you still doubt that?

Debera Jessie:

You may spend your free time to see this book this book. This Graphic Design for Architects: A Manual for Visual Communication is simple to develop you can read it in the recreation area, in the beach, train and also soon. If you did not include much space to bring often the printed book, you can buy often the e-book. It is make you much easier to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.
