## International Handbook of Earthquake & Engineering Seismology, Part B, Volume 81B (International Geophysics) From Academic Press

The two volume *International Handbook of Earthquake and Engineering Seismology* represents the International Association of Seismology and Physics of the Earth's Interior's (IASPEI) ambition to provide a comprehensive overview of our present knowledge of earthquakes and seismology. This state-of-the-art work is the only reference to cover all aspects of seismology--a "resource library" for civil and structural engineers, geologists, geophysicists, and seismologists in academia and industry around the globe. **Part B**, by more than 100 leading researchers from major institutions of science around the globe, features 34 chapters detailing strong-motion seismology, earthquake engineering, quake prediction and hazards mitigation, as well as detailed reports from more than 40 nations.

Also available is *The International Handbook of Earthquake and Engineering Seismology, Part A*.

- Authoritative articles by more than 100 leading scientists
- Extensive glossary of terminology plus 2000+ biographical sketches of notable seismologists

## **Editorial Review**

### **Review**

"Monumental in scope, authoritative in treatment, and historic in impact, the **International Handbook of Earthquake and Engineering Seismology** will be the most important source book for seismology and its applications for years to come. This is one of those exceptional books that libraries and professionals from academia, industry, and government cannot do without."

-Frank Press, President Emeritus, US National Academy of Sciences

"The **International Handbook of Earthquake & Engineering Seismology** is an impressive and comprehensive collection of articles by leaders in their fields. It is sure to be a valuable resource for students, research workers and practitioners who need a broad, reliable and up-to-date source of information and knowledge in seismological fields.

-George W. Houser, Professor Emeritus, California Institute of Technology

"...of great interest to practicing engineers and researchers alike...a highly valuable source of helpful information for years to come in enhancing public and industrial safety worldwide."

-William J. Hall, Professor Emeritus of Civil Engineering, University of Illinois, Urbana-Champaign

"Great credit goes to the Editors for attracting...the most experienced and highly regarded experts from more than 50 countries to participate in this comprehensive and truly international work. It covers not only the history of our science, but leads to the present day frontiers of our knowledge."

-Hans Berckhemer, Past President of IASPEI, from the Foreword

"a unique reference work that utilizes modern computer technology to supplement the printed information. It provides data sets (e.g. catalogs of world earthquakes) that cannot be found anywhere else...[a] magnum opus of seismology."

-Cinna Lomnitz for "Natural Hazards"
