Oxford Textbook of Epilepsy and Epileptic Seizures (Oxford Textbooks in Clinical Neurology) By Mark Cook, Samden Lhatoo

Epilepsy is the most common serious neurological condition, affecting children and adults, and can occur in a variety of medical settings. It has many causes and many forms, and a variable prognosis. Mortality and morbidity are high, social and legal consequences can stretch well beyond the purely medical, and its management is often poor.

Part of the *Oxford Textbooks in Clinical Neurology* (OTCN) series, this volume covers the scientific basis, clinical diagnosis, and treatment of epilepsy and epileptic seizures. Written by internationally-renowned specialists, each chapter comprehensively covers the current knowledge and evidence base related to each aspect of the disorder, with an emphasis on the personal experience of the authors.

Editorial Review

Review

"As is clear from the front cover image of a patient with depth electrodes and extensive intracranial grids in situ, The Oxford Textbook of Epilepsy and Epileptic Seizures is determined to deliver a comprehensive opinion of modern epileptology. In this endeavor it undoubtedly succeeds." --*Epilepsy & Behavior*
