Scientific Papers and Presentations, Second Edition: Navigating Scientific Communication in Today's World By Martha Davis

Electronic publishing and electronic means of text and data presentation have changed enormously since the first edition was first published in 1997. This second edition applies traditional principles to today's, modern techniques. In addition to substantial changes on the poster presentations and visual aids chapters, the chapter on proposal writing discusses in more detail grant writing proposals. A new chapter has also been dedicated to international students studying in the United States.

Selected Contents:

- Searching and Reviewing Scientific Literature
- The Graduate Thesis
- Publishing in Scientific Journals
- Reviewing and Revising
- Titles and Abstracts
- Ethical and Legal Issues
- Scientific Presentations
- Communication without words
- The Oral Presentation
- Poster Presentations

Editorial Review

Review

"...a wealth of information and detail. ...a useful guide to the student who wants a one-stop guide to communicating, an introduction and pointer to more detailed information for the more conscientious or needy student and should find a place in departmental libraries."

-Dr. Jacqueline M. Atkinson, University of Glasgow, in **CLINICAL CHEMISTRY AND LABORATORY MEDICINE** (1999)

"Many alternative references are available, but this book would be my first choice for advanced college students, or graduate students, including medical students and residents. The book itself is an outstanding example of effective written communication."

--DOODY PUBLISHING

"In reviewing a scientific book, the primary question is, will the book be useful? To be useful, the information in the book must be needed and the text must be comprehensible. Does *Scientific Papers and Presentations* meet these criteria? Yes, it does, is my conclusion. I read most of this book while attending a conference, and I can say that many of the presenters there would certainly have benefitted from reading it. Unfortunately, this was true of many of the 'seasoned professionals' as well as of the more junior scientists for whom this book is intended. Each time, presented data were either incomprehensible or uninterpretable. I made notes and then checked to see if a thorough knowledge of the material in this book could have improved (or in some cases salvaged) the presentation. The answer was always yes."

--David Andrews in **TIBS**

From the Back Cover

For the second edition of **SCIENTIFIC PAPERS AND PRESENTATIONS** the text has been completely overhauled with references updated and new materials and new approaches incorporated into every chapter. A new chapter has been added dealing with communication issues of international students.

Communication skills are among the qualities most prized by those who hire and promote scientists. A few of the benefits of this book include:

- * Improving your skills for employability
- * Increasing your confidence in oral communication
- * Producing a thesis / journal article / proposal / review
- * Making your visual aids and presentations more effective
- * Constructing posters for scientific meetings

Convenient, easy-to-use chapters and written in a conversational tone, this book provides practical instruction for ? Designing visual aids ? Writing first drafts ? Reviewing and revising ? Communicating clearly and concisely ? Adhering to stylistic principles ? Presenting data in tables and figures ? Dealing with ethical and legal issues ? Relating science to the lay audience ?

About the author:

The author, Martha Davis, has dedicated the past twenty-five years to developing communication skills in hundreds of graduate-level scientists. She teaches Scientific Writing and Scientific Presentations classes and has reviewed and edited hundreds of scientific papers and presentations. This book stems from answering the questions that graduate students ask.

Audience:

Scientific Papers and Presentations is an essential guide for all science graduates but especially those involved in Biology, Agriculture, Chemistry, Engineering or Health Sciences. The book can be used as a text for courses and seminars, plus it is also a valuable handy reference for anyone working in a scientific field.

About the Author

After teaching English composition and world literature, Martha Davis crossed the line between the humanities and the sciences. Always an aficionado of biology and gardening, her interests led her to the biological and agricultural sciences where she has worked for some 15 years mostly with graduate students relative to their communication skills in science. This handbook is the result of seeking answers to their questions and of recognizing that most other communication handbooks are limited to specific areas of writing or speaking. **Scientific Papers and Presentations** is her attempt to put under one cover the basic guidelines for the communication endeavors of the graduate student as well as the professional scientist.

Users Review

From reader reviews:

Gina Melton:

The e-book untitled Scientific Papers and Presentations, Second Edition: Navigating Scientific Communication in Today's World is the publication that recommended to you you just read. You can see the quality of the guide content that will be shown to a person. The language that article author use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, so the information that they share to your account is absolutely accurate. You also will get the e-book of Scientific Papers and Presentations, Second Edition: Navigating Scientific Communication in Today's World from the publisher to make you far more enjoy free time.

Linda Porter:

Spent a free time to be fun activity to accomplish! A lot of people spent their down time with their family, or their particular friends. Usually they carrying out activity like watching television, about to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Could be reading a book might be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try look for book, may be the publication untitled Scientific Papers and Presentations, Second Edition: Navigating Scientific Communication in Today's World can be fine book to read. May be it might be best activity to you.

Steven Deloatch:

Reading a book for being new life style in this 12 months; every people loves to go through a book. When you study a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you would like get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, along with soon. The Scientific Papers and Presentations, Second Edition: Navigating Scientific Communication in

Today's World provide you with new experience in looking at a book.

Michael Emery:

What is your hobby? Have you heard that question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, All people has different hobby. And you also know that little person including reading or as reading through become their hobby. You should know that reading is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You discover good news or update in relation to something by book. Different categories of books that can you go onto be your object. One of them is this Scientific Papers and Presentations, Second Edition: Navigating Scientific Communication in Today's World.
