## Advances in Knowledge Discovery and Data Mining (American Association for Artificial Intelligence) From AAAI Press

Advances in Knowledge Discovery and Data Mining brings together the latest research -- in statistics, databases, machine learning, and artificial intelligence -- that are part of the exciting and rapidly growing field of Knowledge Discovery and Data Mining. Topics covered include fundamental issues, classification and clustering, trend and deviation analysis, dependency modeling, integrated discovery systems, next generation database systems, and application case studies. The contributors include leading researchers and practitioners from academia, government laboratories, and private industry. The last decade has seen an explosive growth in the generation and collection of data. Advances in data collection, widespread use of bar codes for most commercial products, and the computerization of many business and government transactions have flooded us with data and generated an urgent need for new techniques and tools that can intelligently and automatically assist in transforming this data into useful knowledge. This book is a timely and comprehensive overview of the new generation of techniques and tools for knowledge discovery in data. Distributed for AAAI Press

### **Editorial Review**

#### **About the Author**

Gregory Piatetsky-Shapiro is Senior Member of Technical Staff and Principal Investigator of the Knowledge Discovery Project at GTE Laboratories.

### **Users Review**

#### **From reader reviews:**

##### **Josephine Lowe:**

Book is definitely written, printed, or highlighted for everything. You can learn everything you want by a book. Book has a different type. As you may know that book is important issue to bring us around the world. Adjacent to that you can your reading ability was fluently. A e-book Advances in Knowledge Discovery and Data Mining (American Association for Artificial Intelligence) will make you to possibly be smarter. You can feel far more confidence if you can know about anything. But some of you think in which open or reading some sort of book make you bored. It is not make you fun. Why they could be thought like that? Have you in search of best book or suited book with you?

##### **William Reynolds:**

Information is provisions for anyone to get better life, information nowadays can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider if those information which is within the former life are challenging to be find than now could be taking seriously which one is acceptable to believe or which one often the resource are convinced. If you have the unstable resource then you understand it as your main information you will see huge disadvantage for you. All those possibilities will not happen with you if you take Advances in Knowledge Discovery and Data Mining (American Association for Artificial Intelligence) as the daily resource information.

##### **Elizabeth Branch:**

Spent a free time and energy to be fun activity to do! A lot of people spent their sparetime with their family, or all their friends. Usually they accomplishing activity like watching television, gonna beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Might be reading a book can be option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try look for book, may be the reserve untitled Advances in Knowledge Discovery and Data Mining (American Association for Artificial Intelligence) can be great book to read. May be it could be best activity to you.

**Anthony Brown:**

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is written or printed or highlighted from each source that filled update of news. In this modern era like right now, many ways to get information are available for a person. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just trying to find the Advances in Knowledge Discovery and Data Mining (American Association for Artificial Intelligence) when you desired it?
