### **Cannabis Sativa: The Essential Guide to the World's Finest Marijuana Strains** From Green Candy Press

Cannabis plants are classified into two main groups: Indica and Sativa. This book focuses on Cannabis Sativa, an especially tall and potent species of marijuana plant that true connoisseurs love not only for its smoke that induces a desire to create art and socialize with people, but also for the interesting challenges it presents to growers due to its size. No other strain guide has looked at Cannabis Sativa in such depth before, and the fan base established by the previous best-selling book, Cannabis Indica, is eagerly awaiting the release of this new title.

Featuring one hundred strains of amazing Sativa-dominant genetics from one hundred of the world's best marijuana breeders, this book is a must-have for pot enthusiasts, pot growers, and pot connoisseurs, new and old alike.

Cannabis Sativa features one hundred incredible strains from one hundred different seed breeders—more than all other cannabis strain guides put together—and strains from such varied countries as Britain, Holland, Canada, Russia, Spain, Chile, Switzerland, Germany, France, Afghanistan, Pakistan, India and throughout the USA. No other guide features this many emerging seed breeders, as well as established cannabis genetics companies. The Cannabis Sativa and Cannabis Indica series of books are set to become the go-to books for connoisseurs and growers looking to expand their knowledge about the plant, and the genetics in their gardens.

Features classic Sativa strains, such as Grapefruit, New York City Diesel, AK-47 and Santa Maria, as well as fascinating brand new, never-before-seen varieties from previously unknown seed breeders. This book also features multiple strain variations on Haze – the strain of choice for connoisseur breeders and smokers, and a favorite amongst medicinal users throughout the USA.

Filled with hundreds of beautiful full-color images, this book is ideal for every grow room, dorm room, and living room. Each plant is discussed in detail, with accurate information on genetics and lineage so that readers can become experts on Cannabis Sativa strains—their aromas, flavors, THC content, medical

potentials and growth patterns.

Cannabis Sativa is a true resource for the Cannabis community, providing useful information to enthusiasts and invaluable insights to the seed-buying and pot smoking public. Unlike its competitor, The Big Book of Buds, which features a mere thirty companies that pay to be included and over twenty pages of advertisements, this book is a true reflection of the global marijuana seed breeding movement. Strains were selected based on their relevance to the current market and the strength of their genetics. There are no advertisements in the book and no one paid to be included. Chief editor, bestselling author S.T. Oner, carefully selected all strains based on merit, not advertising dollars. This grassroots philosophy has resulted in the previous release in this series, Cannabis Indica, gaining much attention and praise as well as consistent sales.

With an introduction by Greg Green, the bestselling author of The Cannabis Grow Bible, focusing on the history and origins of the Cannabis Sativa plant, as well as its growth patterns, genetic tendencies, breeding potential and smokeability, this book is every true cannabis enthusiast's dream.
