**Sex, Lies, and Menopause: The Shocking Truth About Synthetic Hormones and the Benefits of Natural Alternatives** By T. S. Wiley, Julie, M.D. Taguchi, Bent, PhD Formby

Turning thirty years of medical and cultural wisdom on its head, *Sex, Lies, and Menopause* challenges both the medical establishment and modern feminists to prove that menopause does not have to be deadly.

In this revolutionary work -- a landmark that signals the true beginning of feminist medicine -- a doctor, a philosopher, and a scientist prove that by postponing marriage and motherhood, women have accelerated the aging process, resulting in earlier menopause and, ultimately for thousands, earlier death.

In *Sex, Lies, and Menopause*, T. S. Wiley, Julie Taguchi, M.D., and Bent Formby, Ph.D., offer strong evidence that the use of synthetic hormones leads to cancer and advise women to turn to natural hormone-replacement therapy -- derived from plants, not drugs -- to help them elevate their estrogen level for greater energy, libido, and intellectual capacity.

Provocative, empowering, and scientifically sound, *Sex, Lies, and Menopause* addresses the inherent benefits of natural progesterone, reveals the lies advanced by the medical and drug establishments, and challenges women to demand a medical future where their health comes first. The research presented in *Sex, Lies, and Menopause* will at last allow women to create their own plan of action to put themselves safely on the path to better health and hormonal balance at any stage of life.
