There's now a solution to stress that literally rewires your brain for a life of doing well, and being well, on your way to flourishing.

The most important brain discovery in the last 400 years concerns a simple but powerful shift in attitude that can change a brain wired for stress into a brain powered for success. This specific shift literally rewires the brain to deliver the full measure of intelligence, creativity, and emotional balance that enables you to flourish instead of struggle. It's a higher state of mind anyone can attain stimulating the higher brain function that unblocks the health, wealth, and love we all desire.

About the Author

Don Joseph Goewey managed the department of psychiatry at Stanford Medical School, ran a regional emergency medical services system, and for twelve years headed an internationally recognized institute that pioneered an approach to catastrophic life events. He has worked with some of the most stressful situations on earth—with people facing terminal illness, parents struggling with the loss of a child, prisoners adjusting to a life sentence, and refugees of the genocidal war in Bosnia struggling with extreme post-traumatic stress. He spent six years directing a think tank aimed at integrating breakthroughs in neuroscience and psychology. From this work, he innovated a model for changing brain structure to extinguish stress reactions and amplify the higher brain function that enables a human being to flourish. The success of the model in helping people end stress in high-pressure workplaces like Cisco Systems and Wells Fargo has been unprecedented.
